SUMMARY

BCA graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience building Generative AI, Retrieval-Augmented Generation (RAG), Agentic AI, Computer Vision, and end-to-end Machine Learning solutions. Skilled in Python, SQL, LangChain, LLMs, FAISS, NLP, YOLOv8, MLflow, SHAP, and model deployment. Experienced in developing AI-powered applications that combine machine learning models, LLMs, vector databases, and real-world data to solve practical problems. Seeking an AI Engineer, Machine Learning Engineer, or Generative AI Engineer role.

SKILLS

Programming: Python, SQL
Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Scikit-learn
Generative AI: Generative AI, Large Language Models (LLMs), Prompt Engineering, RAG, LangChain, AI Agents, Agentic AI
NLP: NLP, Text Processing, TF-IDF, Embeddings, Semantic Search
Vector Databases: FAISS, ChromaDB
Computer Vision: YOLOv8, Object Detection, Image Processing
MLOps & Deployment: MLflow, SHAP, PSI Monitoring, Flask REST API
Data Science: NumPy, Pandas, Matplotlib, Seaborn, EDA, Statistical Analysis
Tools: Git, GitHub, Jupyter Notebook, VS Code, Streamlit, Ollama

PROFESSIONAL EXPERIENCE

Generative AI & Agentic AI Mentor | **Naresh i Technologies, Hyderabad** Apr 2026 – Present

- Mentored students in Generative AI and Agentic AI through hands-on, project-based sessions.
- Guided learners across 6 core topics: LLMs, RAG, prompt engineering, LangChain, LangGraph, and AI agent development using Python.
- Conducted practical sessions, reviewed projects, troubleshot issues, and explained GenAI and Agentic AI concepts through real-world examples.

PROJECTS

LocalGPT – Multimodal AI Assistant GitHub

- Developed a local multimodal Generative AI assistant using Streamlit, Ollama, LangChain, and FAISS, integrating 5 capabilities: chat, RAG, computer vision, voice AI, and image generation.
- Engineered a multi-document RAG pipeline supporting 6 file formats (PDF, DOCX, CSV, XLSX, PPTX, TXT) with FAISS.
- Integrated 4 local LLMs (Llama 3, Mistral, Gemma, LLaVA) via Ollama for document Q&A and multimodal AI.
- Incorporated YOLOv8 for object detection; designed local AI workflows to cut cloud dependency.

Credit Risk Prediction & MLOps System – MLflow & Flask GitHub

- Built an end-to-end default-risk prediction system using WOE-based features and Logistic Regression.
- Evaluated using Gini coefficient and KS statistic; applied SHAP for feature-level explainability.
- Implemented MLflow experiment tracking and PSI-based monitoring to detect drift.
- Deployed the solution as a Flask REST API for real-time prediction.

EDUCATION

Bachelor of Computer Applications (BCA) 2023 – 2026
Dr. Babasaheb Ambedkar Marathwada University (BAMU), Chhatrapati Sambhaji Nagar CGPA: 7.06

Higher Secondary Certificate (HSC) 2019 – 2020
Maharashtra State Board Percentage: 63.69%

CERTIFICATIONS

- Certified Full Stack Data Science & AI Professional – Naresh i Technologies, Hyderabad
- Government Certificate in Computer Typing (GCC – TBC), English 30 & 40 WPM – MSCE, Pune
